Cone Ring Coupling – Pilot Bore

Cone Ring Coupling - Pilot Bore - Type 020 030 038

The Cone Ring Coupling are based on a time proven design. The cone ring coupling is as popular as ever for its ease of maintenance and no lubrication is required. The cone ring coupling consists of pairs, the flanges are high-grade cast iron. The hexagonal pin studs on one of the flanges are accompanied with tapered synthetic rubber rings which engages into the clearance bored holes in the opposite half. Cone rings absorb the commonly encountered misalignment, shock, vibration, impulse and expansion. The rubber cone rings can be easily removed and changed without the need to take the coupling off the shaft which ensures a trouble-free maintenance process. The cone ring couplings are available in pilot bore and taper lock bore which can be easily adapted to your machine.
