Genius FALCON M20 Slide Gate Motor Kit Replaces 20C

Electro-mechanical gear motor range for heavy sliding gates up to 2000 kg. It has a compact design which is sturdy, safe and quiet with a magnetic limit switch and an integrated control board with an easy to use programming display

Features and Benefits:

FALCON are non-reversible electro-mechanical gear motors that are made to last.

The gear motor body is aluminium painted with polyester powders and the protective housing in ABS make it a solid and safe product. The practical release system can be activated by a lock with personalised key.

Magnetic limit-switch designed by Genius, entirely protected.

The gear motors have a pre-wired board with transparent protection and programming push-buttons outside the cover, as well as a rotating board-support to facilitate access during programming.

The "C" versions, with Genius control board, have easy-to-understand on-display programming. Functions such as an electronic clutch, slow-downs, braking and separate inputs for accessories put the Falcon at the top of the market.

Irreversible – As the gearmotor is non-reversing, no electric locks need be installed and, in the event of power failure, the release device (protected by a customised key) makes it possible to open and close manually.
