

# Fibaro Flood Sensor

## Fibaro Flood Sensor

The Fibaro Flood Sensor is small, has several extra features, and a futuristic appearance. This special device can protect the security of you and your family. The Fibaro Flood Sensor uses cutting-edge technology and accuracy to notify you in the event of a flood or sudden changes in temperature. Everything without requiring expert installation and requiring no maintenance.

The Fibaro Flood Sensor has two mounting options: it can be wall mounted to allow for remote monitoring using an extended cable probe, or it can be set on the floor where deployed probes will detect water below the device. The sensor features an integrated tilt sensor that enables it to alert you when it is being tampered with, an LED indicator and sound alarm that may be powered by batteries or the mains. The LED light, which also functions as a Z-Wave network communication range indicator, is used to indicate the presence of water or to send out notifications.

## **Features**

- The Fibaro Z-Wave Flood Water Leak Sensor is designed to be placed on the floor or on a wall with a flood sensor probe extended by connected wire.
- Equipped with a tilt sensor reporting tilt or movement to the main controller e.g. when someone has taken the Sensor from its original location.
- LED diode signals flood, operating mode or the Z-Wave network communication range.
- Sink-proof, which means it drifts on the water surface and keeps on sending alarm signal in case of substantial inundation of water.
- Built in LED indicator and acoustic alarm.
