Safetech Adjustable Self Closing Hinges (Pair)

Innovative Gate Hinge Tension Variable System

Safetech self-closing gate hinges are the only gate hinges on the market to feature our patented tension adjustment system. Once the gate hinge is in place, adjustments are made with just one handy allen-key, which we provide. By simply turning the key clockwise, you can increase the tension of the self-closing gate hinge. As the tension changes, the system makes a defined CLICK sound that lets you monitor just how much you've adjusted the gate hinge. The tension variable system makes Safetech Gate Hinges easy to install, so you can get the job finished in record time.

Put the adjustment key in the Customers' hands

When you have finished installing a new self-closing gate with Safetech gate hinges, you'll leave behind the only tool that homeowners need to adjust their hinges. Adjusting the tension with the included allen-key is so simple that any homeowner can do it, eliminating the chance of being recalled to the job for maintenance.
